

Specialists in the Food and Pharmaceutical Manufacturing Industry.

Established in 1997, Inspection Systems has developed a reputation for providing high performance systems, comprehensive support and specialist advice to the food and pharmaceutical manufacturing industry in Australia and New Zealand.

Our customers include many of the world's leading manufacturers, who choose Inspection Systems to help them comply with government regulations and mitigate risk through the detection and removal of contaminants.

Inspection Systems is continually focused on innovation, partnering with world leading companies including Loma, Herbert, MOCON, Global Vision, Radix and Converging Solutions to bring customers the most advanced product inspection systems on the market.

Our range of products includes metal detectors, x-ray systems, checkweighers, weigh labellers, labellers, combination systems, package testing systems, colour sorting, permeation instruments, proofreading solutions and pack handling systems.
