Inspection Systems appoint New Service Technician

So we can maintain the highest level of service support, Inspection Systems recently welcomed the addition of Jim Pappas to the service department in Melbourne.

Jim comes over to us from Autopac Systems and brings with him a wealth of experience on inspection machinery and will be sure to add further depth to our service resources so we can continue to offer our customers on-site and in-house support where required on the systems we supply.

Jim started with us in October and will be introducing himself to our customer base and getting familiar with our installations over the next few months. We are sure he will become an invaluable member of the team within a very short time.
